

DONGWOOK KWON

AI Engineer • Agentic AI Systems & LLM Evaluation

✉ tomiyadragon@gmail.com ☎ +82 10-6612-9246 📍 Seoul, Republic of Korea 🌐 dongwooky.github.io 📄 dongwooky

EXPERIENCE

AI Engineer, Intelligent Agent Technology Team

Suresoft Technologies

📅 Dec 2025 – Present 📍 Seongnam, Korea

- Developing an AI validation system utilizing agentic AI architectures for enterprise model verification.
- Designing autonomous and collaborative agents that verify and evaluate ML models at scale.
- Building agentic AI systems for systematic, scalable, reliable AI verification.

Research Assistant

Bio-Computing & ML Lab, Kwangwoon University

📅 Aug 2021 – Dec 2025 📍 Seoul, Korea

- Deep-learning for anomaly detection in time-series (ECG, cyber-physical systems).
- Co-developed Active Kill-Switch and Biomarker-Based Defense for life-threatening IoT medical devices.
- Published in EMNLP 2025 (Oral) and ACL 2026; co-author on two granted KR patents.

Visiting Researcher

LG Electronics Canada (with University of Toronto)

📅 Jan 2025 – Jul 2025 📍 Toronto, ON, Canada

- Built an LLM-driven assessment framework for evaluating agentic AI systems.

AI Development Project, Summer Program

Qualcomm Institute, UC San Diego

📅 Jul 2022 – Aug 2022 📍 San Diego, CA, USA

- Personality-based drug addiction prediction system using ML models. Achievement Award.

SELECTED PUBLICATIONS

CascadeDebate: Multi-Agent Deliberation for Cost-Aware LLM Cascades

ACL 2026 – Industry Track (Poster)

📅 2026

D. Kwon[†] et al. [†]Equal contribution.

EDUCATION

M.S. Computer Engineering

Kwangwoon University

📅 Mar 2024 – Feb 2026 📍 Seoul, Korea

GPA: 4.33 / 4.5 (98.1%)

Graduate Research Program

University of Toronto

📅 Jan – Jul 2025 📍 Toronto, Canada

Mech & Industrial Eng. GPA: 3.68 / 4.0

B.S. Electronics & Communications Engineering

Kwangwoon University

📅 Mar 2019 – Feb 2024 📍 Seoul, Korea

GPA: 3.41 / 4.5 (88.1%)

MOST PROUD OF

🏆 Gold (Ministerial Award)
Smart Maritime Logistics – Minister of Oceans and Fisheries, 2021

🏆 Achievement Award
Qualcomm Institute AI Project – UC San Diego, 2022

🏆 Outstanding Student Paper
IEIE Conference, 2025

🏆 Best Poster Silver
IBEC 2024

🏆 Silver Award
23rd Embedded Software Competition (KIISE), 2025

SKILLS

Python C/C++ PyTorch
Transformers LangChain
Linux Docker CUDA

Agentic AI Multi-Agent LLM

GEMMAS: Graph-based Evaluation Metrics for Multi-Agent Systems

EMNLP 2025 — Industry Track (Oral)

📅 2025

D. Kwon[†] et al. [†]Equal contribution.

Graph-Enhanced Bidirectional GRU for Anomaly Detection in Power Generation Environments

DMKD (Springer Nature) — under review

📅 2025

Hybrid GAT + Transformer for implantable-device anomaly detection

IBEC 2024 — Best Poster Silver

📅 2024

PATENTS

Method for Implantable Medical Device to Detect Anomaly in Real Time

KR 10-2961984

📅 Apr 2026

GPT API-Based Network Anomaly Detection

KR 10-2848814

📅 Aug 2025

- GNN
- Time-Series Anomaly
- Biomedical Signals

LANGUAGES

- Korean
- English

LEADERSHIP

- President

Kwangwoon Intl. Student Association
- Director of Filming & Editing

Kwangwoon Broadcasting Center (KWBC)
- Class Representative

Dept. of Electronics & Comms Engineering
