EXPERIENCE

AI Engineer, Intelligent Agent Technology Team

Suresoft Technologies

Dec 2025 – Present

Seongnam, Korea

- Developing an AI validation system utilizing AI agent-based architectures for enterprise model verification.
- Designing autonomous and collaborative AI agents that verify and evaluate machine-learning models at scale.
- Building agentic AI systems to enable systematic, scalable, and reliable AI verification processes.

Research Assistant

Bio-Computing & ML Lab, Kwangwoon University

Aug 2021 – Dec 2025

Seoul, Korea

- Researched deep-learning algorithms for anomaly detection in time-series data (ECG, cyber-physical systems).
- Co-developed an Active Kill-Switch and Biomarker-Based Defense System for life-threatening IoT medical devices.
- Published in EMNLP 2025 (Oral) and ACL 2026; co-author on two granted Republic of Korea patents.

Visiting Researcher

LG Electronics Canada

Jan 2025 – Jul 2025

Toronto, ON, Canada

- Built an LLM-driven assessment framework for evaluating performance of agentic AI systems.
- Work fed directly into peer-reviewed publications at EMNLP 2025 and ACL 2026.

AI Development Project Participant, Summer Program

Qualcomm Institute, UC San Diego

Jul 2022 – Aug 2022

San Diego, CA, USA

- Built a personality-based drug-addiction prediction system using machine-learning models.
- Recognized with the program's Achievement Award.

CascadeDebate: Multi-Agent Deliberation for Cost-Aware LLM Cascades

EDUCATION

M.S. Computer Engineering

Kwangwoon University

Mar 2024 – Feb 2026

Seoul, Korea

GPA: 4.33 / 4.5 (98.1%)

Graduate Research Program

University of Toronto

Jan 2025 – Jul 2025

Toronto, ON, Canada

GPA: 3.68 / 4.0

B.S. Electronics and Communications Engineering

Kwangwoon University

Mar 2019 – Feb 2024

Seoul, Korea

GPA: 3.41 / 4.5 (88.1%)

-*MOST PROUD OF*

Achievement Award

Qualcomm Institute AI Development Project – UC San Diego, 2022

Gold Award (Ministerial Award)

2021 Smart Maritime Logistics Project – Minister of Oceans and Fisheries, 2021

Outstanding Student Paper Award

Conference of the Institute of Electronics and Information Engineers, 2025

Best Poster Award (Silver)

10th International Biomedical Engineering Conference (IBEC 2024), 2024

Outstanding Paper Award

Conference of the Korean Society of Medical and Biological Engineering, 2023

Silver Award

23rd Embedded Software Competition (KIISE), 2025

ACL 2026 – Industry Track (Poster)

📅 2026

D. Kwon[†] et al. [†]Equal contribution.

GEMMAS: Graph-based Evaluation Metrics for Multi Agent Systems

EMNLP 2025 – Industry Track (Oral)

📅 2025

D. Kwon[†] et al. [†]Equal contribution.

Hybrid GAT + Transformer for implantable-device anomaly detection

IBEC 2024 – Best Poster Award – Silver

📅 2024

Enhancing medical device security with GNN-GRU anomaly detection model

KOSOMBE 2023 – Outstanding Paper Award

📅 2023

Graph-Enhanced Bidirectional GRU for Anomaly Detection in Power Generation Environments

Data Mining and Knowledge Discovery (Springer Nature) – under review

📅 2025

PATENTS

Method for Implantable Medical Device to Detect Anomaly in Real Time

KR 10-2961984

📅 Apr 2026

GPT API-Based Network Anomaly Detection

KR 10-2848814

📅 Aug 2025

Bronze Award

Hanium ICT Mentoring Competition – FKII, 2022

Excellence Award

18th Kwangwoon ICT Exhibition (KWIX) – Kwangwoon University, 2022

Grand Prize

MY (Multi-Y) Capstone Design Competition – Kwangwoon University, 2021

SKILLS

Python

C/C++

MATLAB

Bash

PyTorch

TensorFlow

Transformers

Linux

Docker

Git

Agentic AI

multi-agent LLM systems
