About me —
AI engineer focused on agentic AI systems and LLM-based multi-agent evaluation. Research background in deep-learning anomaly detection for time-series data (ECG, cyber-physical systems). Published at EMNLP 2025 (Oral) and ACL 2026; co-author on two granted Republic of Korea patents.

Skill —

Python

PyTorch & Transformers

C

LangChain & LLMs

Linux & Docker

CUDA

MATLAB

Agentic AI★5.5 Multi-Agent LLM★5
GNN★4.5 Anomaly Detection★5

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

about

AI Engineer at Suresoft Technologies' Intelligent Agent Technology Team. Master's in Computer Engineering at Kwangwoon University. Visiting research at LG Electronics Canada with the University of Toronto.

education

- 2024–2026 M.S. in Computer Engineering Kwangwoon University, Seoul
GPA 4.33 / 4.5 (98.1%). Bio-Computing & Machine Learning Laboratory.
- 2025 Graduate Research Program University of Toronto, Canada
GPA 3.68 / 4.0. Mechanical and Industrial Engineering.
- 2019–2024 B.S. in Electronics and Communications Engineering Kwangwoon University, Seoul
GPA 3.41 / 4.5 (88.1%).

experience

- 2025–Now AI Engineer, Intelligent Agent Technology Team Suresoft Technologies, Seongnam
Developing AI validation system using agentic AI architectures for enterprise model verification. Designing autonomous and collaborative agents for systematic AI verification.
- 2021–2025 Research Assistant Bio-Computing & ML Lab, Kwangwoon U.
Deep-learning anomaly detection in time-series (ECG, cyber-physical systems). EMNLP 2025 (Oral), ACL 2026; two granted KR patents.
- 2025 Visiting Researcher LG Electronics Canada
Built LLM-driven assessment framework for evaluating agentic AI systems.
- 2022 AI Development Project Participant, Summer Program Qualcomm Institute, UC San Diego
Personality-based drug-addiction prediction. Achievement Award.

publications

- 2026 D. Kwon[†] et al. "CascadeDebate: Multi-Agent Deliberation for Cost-Aware LLM Cascades." ACL 2026 — Industry (Poster).
- 2025 D. Kwon[†] et al. "GEMMAS: Graph-based Evaluation Metrics for Multi Agent Systems." EMNLP 2025 — Industry (Oral).
- 2024 D. Kwon et al. "Hybrid GAT + Transformer for implantable-device anomaly detection." IBEC 2024 — Best Poster Silver.
- 2023 D. Kwon et al. "Enhancing medical device security with GNN-GRU anomaly detection model." KOSOMBE 2023 — Outstanding Paper Award.
- 2025 D. Kwon et al. "Graph-Enhanced Bi-GRU for Anomaly Detection in Power Generation." DMKD (Springer Nature, under review).

awards

- 2025 Silver, 23rd Embedded Software Competition (KIISE).
- 2025 Outstanding Student Paper, IEIE Conference.
- 2024 Best Poster Silver, IBEC 2024.
- 2022 Achievement, Qualcomm Institute AI Project — UC San Diego.
- 2021 Gold (Ministerial), Smart Maritime Logistics Project — Minister of Oceans and Fisheries.

patents

- Apr 2026 KR 10-2961984 — Real-time anomaly detection for implantable medical devices.
- Aug 2025 KR 10-2848814 — GPT API-Based Network Anomaly Detection.
